Language assessment

An online test is to be completed in order to evaluate the trainee's level.

At the end of the test, a needs analysis questionnaire should also be completed so that individual objectives can be defined.

On receiving your test, a telephone appointment will be made for an oral assessment, during which a training programme will be defined.

You will need the following requirements:

A personal computer (not a Mac) with a sound card, speakers or headphones.

A Windows operating system and Internet Explorer.

Flash player.
